pice near Dutch Flat Wednesday, and was It is gratifying to know that the telephone monopoly has encountered a rival that will make it a great deal more pliant to public needs hereafter. The statement is that J. P. Freeman, of Chicago, has invented and patented a telephonic improvement that makes his instrument to Thiers, France, in which 24 persons were killed all intents and purposes a new telephone, distinct from the Bell instrument and not barred by its patent. Bell's telephone is operated upon the principle of a continuous electrical current; Freeman's is based upon the operation of an intermittent or broken current. The Freeman transmitter has two points that touch the diaphragm Ireland, where naval maneuvers on a grand and balance on a lever resting upon a platinum fulcrum. And now the question with the governing chapter of the Garden City Cathedral s, "What are they going to do with it?" Mrs. Stewart has built a cathedral for a church that properly has no cathedral cheme in its plan of formation or government, for it has in its ritual or canonical regulations no place for a Dean or a chapter or a Chancellor. The cathedral has been built away out in the country, and a big, unwieldy cathedral school or academy, and a fanciful Bishop's residence, have been built near by. The village town or city to gather about these piles of masonry is yet to develop. In Europe villages may live upon churches; here the thing is impossible. Mrs. Stewart has made a huge error; the Protestant Episco pal Church has made a greater one in permitting her to make it. The church has a cathedral on hand and no one to seat in its name; a Bishop's residence, and no Bishop to live in it-for the great center of intelligence and culture is too near by to warrant the Bishop in deserting it. The A "tar-and-feathers" picnic was held Stewart cathedral promises even thus early to become a laughing stock in church

the following resolutions, which were unanimously adopted: The Republican party of Ohio announces the following platform of principles: The right to vote, accorded by the Constitution of the United States, is the concern of the whole people, and must be secured at all hazards to every citizen in every part of the republic; existing guaran-tees must be sacredly maintained, and addition-al ones provided, if necessary, that equal pro-tection of the laws and the equal enjoyment of suffrage shall not fail or be abridged in any way

of the States of the Union. The Democratic party, which owes its national victory last fall to the willful suppression of the ballot, cannot be looked to for the enforcement of these constitutional guarantees, and the hope of friends of equal laws and equal suffrage is in the Republican party, which pledges itself to wage the contest to a successful end. We want such legislation as will harmonize the relations between labor and capital, and promote the welfare of the people, and protect and foster the industries of the State. We favor the establishment of a National Bureau of Industry, the enforcement of the eight-hour law, and adequate appropriations from the public revenues for general education, wherever the same needed. We denounce the importation of contract labor, and favor the most stringent laws to effectively prevent it. We are opposed to the acquisition of public lands, or any part thereof, by nonresident aliens. We are in favor of a protective tariff, which will encourage American development and furnish remunerative employment to American labor, and we are opposed to the British policy advocated by the Democratic party, under the guise of a tariff for revenue only. We demand the restoration of the wool duty of 1857, or its full equivalent, and we denounce the Democratic Congress for failing to make good the pledges they made in this behalf. special pleas:

The defendant, as I have stated, has put in a plea of a former conviction of the offense charged in this indictment, and also a plea that he has heretofore been placed in jeopardy upon an indictment for that offense. On this subject the law is well settled. No man can legally be punished or convicted of an offense if he has been formerly tried for that offense, whether the former trial resulted in an acquittal or in a conviction. The only question as to which any difficulty can arise in such a case, is as to whether the offense of which the defendant was formerly convicted is the same offense as that for which he is afterward put on trial. On this point I instruct you that the two offenses are considered in law to be the same, whenever the act committed by the defendant and for which he is prosecuted is the same in both cases, no matter what the is the same in both cases, no matter what the is the defendant of the committed by the defendant and for which he is prosecuted is the same in both cases, no matter what the conditions that the two offenses are considered in law to be the same in both cases, no matter what the conditions the condition of the little steamer Margie is doing lively business with a barge, bringing fruit up to the Capital Packing Company's cannery from the vicinity of Courtland, making daily trips.

THE "HOME SEEKER."

With a mind matured and enriched by studies of an advanced order, I can safely say that there is an advanced in the bands of those coming into the State in search of homes Our agent at Ogden goes into the cars and places a copy in the hands of each head of a family and single person. The "HOME SEEKER" is the best advertising medium ever offered to those who wish to extend their business to new settlers. To hotel men and real estate agents it is invaluable. An advertisement in an ordinary publication, promiscuously distributed, does not meet with more than one customer out of every humber of the customer of the cation, promiscuously distributed, does not meet with more than one customer out of every hundred people which it reaches. The "HOME SEEKER" is distributed only to those who are coming here with a desire of buying immediately. Not a single copy is wasted. We have received a solid support from the business community of the northern half of the State. The continuous publication of the "HOME SEEKER", is an assured fact. More land can be sold by an advertisement with us than any other way poultry leady errisement with us than any other way known. We shall make the "HOME SEEKER" subserve the best interests of the northern half of the State. It is issued to promote immigration and to locate the settlers in the northern counties. We ask the support of the business men of that region which we are laboring to build up. Our work is important to every branch of business. If you want to help your selves, help us.

The Government Crisis in England. LONDON, June 11th .- Everything in re and to the Government crisis is still unsettled. The Standard (Conservative) de-

clares that the Conservatives are ready to form a Government at the bidding of the Queen. The News (Liberal) urges Gladstone to persist in his resolution to resign, and says that a few months of hateful Tory rule will return him to power stronger than ever before. The Times advises the Ministers to reconsider their intention of resign ng. It says that the result of the vote Monday night was due to defective meas ures of the Liberal whips for getting mem bers to attend. It says plainly that the Ministry will find in the Queen an awkward customer, who will insist upon being given cogent reasons for their proposed a ion, and even then will probably refuse to accept their resignations.
